Front End Developer duties and responsibilities

A Front End Developer's main goal is to combine technology and design to create inviting, easy-to-use websites for consumers. In order to accomplish this goal, they need to be able to handle the following day-to-day duties:

- Working with clients to develop the overall look and design of a website
- Writing website code with programming languages such as HTML, C++ and Java
- Producing, maintaining and modifying websites and user interfaces

- Incorporating applications, graphics, audio and video clips into client websites
- Creating tools that enhance the user's website experience
- Ensuring websites are accessible across many platforms, including laptops and smartphones
- Routinely testing websites for ease of use, speed and other quality factors
- Fixing any website issues or bugs that arise

What does a Front End Developer do?

Front End Developers typically work for corporations across industries as members of the IT department, but they also work for software companies and work as self-employed individuals. They work closely with other Web Developers and IT professionals to design and troubleshoot unique software and web applications. Their job is to code websites, check their work and preview website layouts to see how code strings influence their designs.

They may also be responsible for using client feedback to make adjustments to current projects to accommodate their needs better.

Front End Developer skills and qualifications

A Front End Developer should have advanced technical skills and strong interpersonal skills to be effective on the job, including:

Copy this section

- Proficiency in website programming languages such as HTML, C#, CSS, Python, C++ and JavaScript
- Understanding of key website design principles and SEO optimization
- Ability to use client input to create functional, creative and user-friendly webpages
- Ability to test and debug websites
- Analytical and detail-oriented
- Excellent verbal and written communication skills
- Advanced problem-solving skills
- Observant and able to remain focused on tasks for long periods of time

Front End Developer salary expectations

- Common salary: **$127,079 yearly**
- Typical salaries range from **$29,000 - $292,000 yearly**

Front End Developer education and training requirements

Front End Developers must have a bachelor's degree in computer science, computer engineering or a related field. Candidates must demonstrate proficiency in programming languages such as HTML, C#, JavaScript and SQL. Front End Developers should also have a thorough understanding of web design and SEO optimization. Most employers prefer applicants who have trained in cross-platform website design and keep themselves up to date on new website tools and languages as they enter the workforce.

Front End Developer experience requirements

Front End Developers should have several years of experience in web or app development. Past experience and work in cross-platform web design is a plus. Front End Developers who are heavily involved in the visual appearance of websites should have work experience in graphic design as well. Many employers look for candidates who have a portfolio of their work and code as proof of their experience and abilities.

Front End Developer Job Description Template

We are looking for a qualified Front-end developer to join our IT team. You will be responsible for building the 'client-side' of our web applications. You should be able to translate our company and customer needs into functional and appealing interactive applications. If you're interested in creating a user-friendly environment by writing code and moving forward in your career, then this job is for you. We expect you to be a tech-savvy professional, who is curious about new digital technologies and aspires to combine usability with visual design. Ultimately, you should be able to create a functional and attractive digital environment for our company, ensuring a great user experience.

Responsibilities

Copy this section

- Use markup languages like HTML to create user-friendly web pages
- Maintain and improve the website
- Optimize applications for maximum speed
- Design mobile-based features
- Collaborate with back-end developers and web designers to improve usability
- Get feedback from, and build solutions for, users and customers
- Write functional requirement documents and guides
- Create quality mockups and prototypes
- Help back-end developers with coding and troubleshooting
- Ensure high-quality graphic standards and brand consistency
- Stay up-to-date on emerging technologies

Requirements

Copy this section

- Proven work experience as a Front-end developer
- Hands on experience with markup languages
- Experience with JavaScript, CSS and jQuery
- Familiarity with browser testing and debugging
- In-depth understanding of the entire web development process (design, development and deployment)
- Understanding of layout aesthetics
- Knowledge of SEO principles
- Familiarity with software like Adobe Suite, Photoshop and content management systems
- An ability to perform well in a fast-paced environment
- Excellent analytical and multitasking skills

Frequently asked questions about

Front End Developers

What is the difference between a Front End Developer and a Back End Developer?

Front End Developers and Back End Developers work closely with one another to design, troubleshoot and update websites or web applications. However, they focus on coding different parts of those applications. For example, Front End Developers specialize in the user side of a web application, which includes everything a web user sees and interacts with on a webpage including drop-down menus, carousel images, banner ads or text icons.

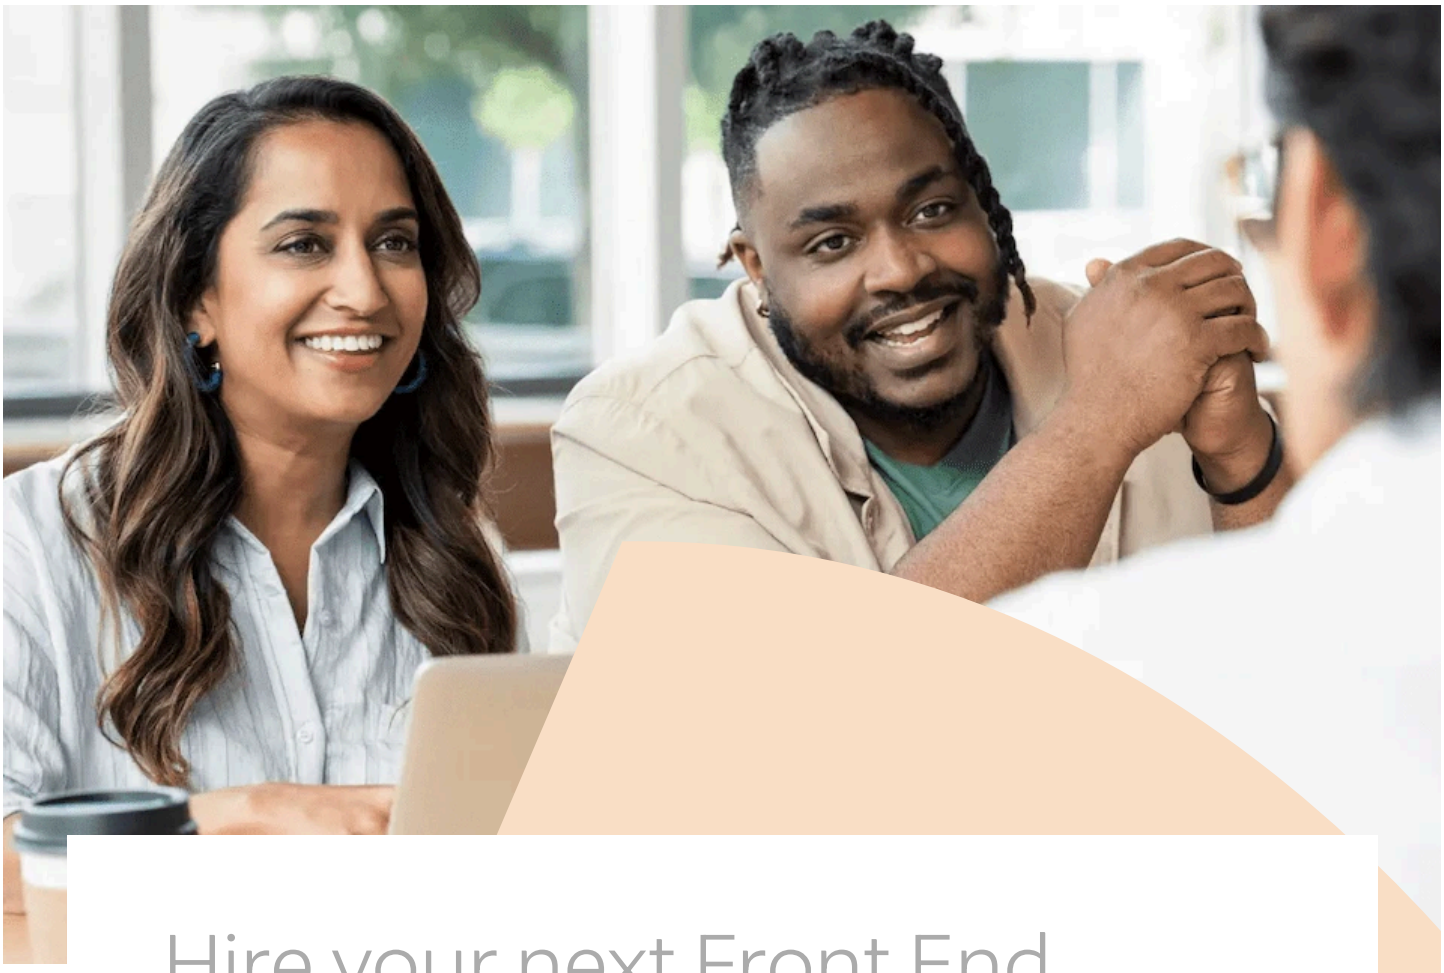

Front End Developers participate in meetings with the web development team. They discuss the progress of their assignments and ask for an extension for assignments that require more time to perform. Once back at their desk, Front End Developers create code for websites and web applications, being sure to check their work and make corrections as they go.

What are the daily duties of a Front End Developer?

On a typical day, a Front End Developer starts by reviewing upcoming deadlines for their assignments. Throughout the day, Front End Developers participate in meetings with the web development team. They discuss the progress of their assignments and ask for an extension for assignments that require more time to perform. Once back at their desk, Front End Developers create application. This means that they create code strings to develop the framework of a web application, which supports the code created by the Front End Developer.

What qualities make a good Front End Developer?

A good Front End Developer values constructive feedback from clients and uses their feedback to deliver a product that aligns best with client needs. A good Front End Developer also has a commitment to quality.
